

Anurag Kumar Singh

STAFF/SENIOR PRODUCT DESIGNER · <http://anurag27k.github.io/>

anurag27k@gmail.com · +919445682075 · <https://www.linkedin.com/in/anurag27k/>

SUMMARY

Anurag is a designer with 8+ years of experience designing enterprise products across AI, SaaS, Demand & Supply Management, Healthcare, ERP, and Government platforms. Proven track record of leading complex 0→1 initiatives, shaping product strategy, and delivering scalable experiences that solve high-impact business problems. Combines strong product thinking, systems design, UX research, and technical expertise to transform ambiguous challenges into intuitive, data-driven solutions. Experienced in partnering with cross-functional leadership to define product vision, influence strategic decisions, and drive AI-powered innovation. Passionate about building high-performing teams, mentoring designers, and fostering a culture of continuous improvement.

SKILLS

Core Skills:

UX Design & Research · UI Design · Interaction Design · Web Development · Testing & Evaluation · User Centered Design · Data Visualization · Service Design · Accessibility · Mixed media · Augmented Reality · Virtual Reality · Graphic Design · Color Theory · Typography · Layout Design

Soft/business Skills:

Leadership and Team Management · Design Strategy and Conceptualization · Creative Direction Project Management Skills · Problem-Solving and Critical Thinking · Strategic Thinking · Presentation Skills · Continuous Learning and Adaptability · Product Vision Definition · Effective Communication · Complex Problem Solving · Planned and Systematic Execution

EDUCATION

IDC School of Design, IIT Bombay

Master of Design (Interaction Design)

NIT Tiruchirappalli

B.Tech (Computer Science & Engineering)

EXPERIENCE

ServiceNow, Bengaluru

Jun 2025 - Present

Senior Product Designer

- Led the design of enterprise AI evaluation experiences for ServiceNow's Now Assist Skill Kit (NASK), including Ground Truth, Agentic Evaluations, and LLM-as-Judge workflows that enable teams to measure, benchmark, and improve AI agent performance with confidence.
- Designed configurable evaluation frameworks and custom LLM metrics for AI agents and workflows, translating complex dimensions such as performance, reasoning quality, efficiency, and safety into intuitive user experiences for enterprise customers and internal teams.
- Drove cross-functional design for strategic AI initiatives including BYOLLM, Ground Truth, and Agentic Evaluation platforms, partnering with Product, Engineering, Research, and Content teams to define product strategy, align stakeholders, and deliver customer-facing AI capabilities.

Intuit, Bengaluru

Jun 2024 - Mar 2025

Senior Product Designer

- Led multiple work streams inside the VEP team (Virtual Expert Platform) involving demand forecasting, capacity planning, allocation and ramp/supply procurement.
- As a platform team, which worked across verticals, I worked in influencing strategy and tech decisions, and AI inclusion, to drive teams towards a more cohesive system where the manual process and tribal knowledge of users is eliminated and users (or planners) can make confident decisions.
- Led team of 3 designers in making their design and decision making processes stronger. Also mentored them from time to time to uplift them professionally making them capable for industry.

Oracle Tech Hub, Bengaluru

Aug 2022 - Jun 2024

User Experience Designer

- Led various commercial projects on government and citizen facing applications which help in permitting, licensing, planning and code enforcement.
- Built synergies with cross-functional teams, of PM, developers and designers, across geographies to develop processes which reduced effort for efficient, timely and scalable results.
- Worked upon strategies to incorporate AI in future vision projects while handling projects independently and provided leadership and guidance to junior designers, fostering their professional growth and development.

D. E. Shaw India Private Limited

May 2021 - Jul 2021

Interaction Designer

- Contributed innovative ideas and solutions to address on a project which involved creating a roadmap planning and employee management application which would effectively reduce the errors while project estimations.
- Conducted user research, usability testing, and analysis to inform the design process and enhance the user experience.
- Created wireframes, prototypes, and user flows to visualize and iterate on design solutions, prioritizing usability and accessibility.

Cerner Corporation

Apr 2020 - Aug 2020

User Experience Designer

- Enabled physicians to dismiss/delete the AI proposed opportunities, a proposed documentation opportunity or clinical validation notification, presented by the NLP Engine of the system.
- Reduced the clicks by 33% while keeping actions least intrusive for the physician.
- Interfaced directly with clients to understand their design requirements, gather feedback, and address any concerns or revisions promptly.

People10 Technologies Inc.

May 2018 - Jun 2019

User Interface/Experience Designer

- Single handedly worked on developing an application for the Bomb squad to record and report details of the suspect package.

- Developed visually appealing and on-brand designs across various mediums including web, mobile, and print. There were 3 parts in here namely collaborator app, marketing website and branding.

Philips Healthcare

Jun 2016 - May 2018

UX Designer and Engineer

- I had the opportunity to work in 2 teams over here. In my first team I worked in the Health watch team where I contributed innovative ideas and solutions to address complex design challenges while handling creation of REST Microservices and their APIs for onboarding experiences.
- In my second team, I created wireframes, prototypes, and user flows to visualize while working on MRI dashboards which demanded adaptability and flexibility in widgets. I was also involved in development of this application using front end technologies like AngularJS, HTML, CSS

PUBLICATIONS

Exploration of inter-marker interactions in Tangible AR

<https://doi.org/10.1145/3562939.3565642>

VRST '22: Proceedings of the 28th ACM Symposium on Virtual Reality Software and Technology

- In this paper we explore multiple inter-marker interactions in the tangible AR space along with their use cases. We developed prototypes that demonstrate primarily five inter-marker interactions.

Grapho: Bringing line chart accessibility to the visually impaired

<https://doi.org/10.1145/3570211.3570213>

IndiaHCI '22: Proceedings of the 13th Indian Conference on Human-Computer Interaction

- In this paper we propose Grapho, a graph visualization physical tool that allows a visually-impaired person to perceive, create and modify a line chart.

Comparative Evaluation of Speech Interfaces in Hindi

https://doi.org/10.1007/978-3-031-80829-6_6

IndiaHCI '24: Proceedings of the 15th Indian Conference on Human-Computer Interaction

- In this paper we evaluated VUIs for Hindi speaking audiences and evaluated them based on their response rate, success rate, helpfulness, goodness, length of response and interruption rate.
